VENDOR APPLICATION

To apply as a vendor for 3DXPrinting shop you first need to have your own original product (a STL file for customers to 3D Print). We highly advise if it's a product that was invented to already have a copyright done on the product so we can put it in product disclaimer so it can not be sold for profit by the customer.

Next, we need you go to the vendor login page, register an account with your information then email us dylanmcniel@3dxprinting.net to start the process to add you the vendor to our store.

We do take 5% per product sold on top of sales tax, We will send the vendor an agreement form that needs to be signed in order to proceed. The process will take 1-3 Business days.

If you email and want to advertise your product I will be happy to do so by advertising your product for the first week on google, Instagram and Facebook. If you happen to want more than a week it will cost $8 for every week after the first week is over.
